

Priorclave Win New Export Orders

For British autoclave manufacturer Priorclave export plays a key and increasingly active role to its overall business growth, currently enjoying major success throughout Asia and the Middle East. Recently it was awarded a United Arab Emirates contract to supply 27, compact C40 steam sterilisers from the company's standard product range. Models to be shipped feature a vacuum drying facility that will ultimately improve overall performance cycle-time to increase throughput.

The C40 bench top Priorclave is proving to be a popular 'export' model, its compact size of just 520mmx610mmx650mm whilst offering a large 40L circular pressurised chamber is attracting interest from many laboratories in food and health-care markets. Since the C40 operates from a standard UK 13A power supply, once unpacked the autoclave can be operational within minutes, easy step-by-step programming guides an operator through a simplified set-up procedure for the sterilisation process to begin.

Priorclave also provides comprehensive worldwide after-sales support including servicing and maintenance to ensure clients maximise the effectiveness of their sterilisation processing.
